## Contents

### 1 Preparedness for Pediatric Emergencies  
- Introduction  
- Emergency Department Preparedness  
- Triage  
- Child-Friendly Area  
- Staffing  
- Interface With Out-of-Hospital Care  
- Equipment and Supplies  
- Other Preparedness Issues  
- Interpersonal Violence  
- Parental Presence  
- Transfer to a Higher Level of Care  
- Disasters  
- Chapter Review

### 2 Pediatric Assessment  
- Introduction  
- Developing a General Impression: The Pediatric Assessment Triangle  
- Assessing the Pediatric ABCDEs  
- Summary of Initial Assessment  
- Focused History and Physical Examination  
- Ongoing Assessment  
- Chapter Review

### 3 The Pediatric Airway in Health and Disease  
- Introduction  
- Anatomic and Physiologic Responses to Airway Maneuvers  
- General Approach to Airway Emergencies  
- Upper Airway Obstruction  
- Foreign Body Aspiration  
- Retropharyngeal Abscess  
- Epiglottis  
- Anaphylaxis  
- Lower Airway Obstruction  
- Bronchiolitis  
- Asthma  
- Disease of Oxygenation and Ventilation and Disease of the Lungs  
- Bronchopulmonary Dysplasia

### 4 Cardiovascular System  
- Introduction  
- Congenital Heart Disease  
- Cyanotic Heart Disease  
- Noncyanotic Heart Disease  
- Congestive Heart Failure  
- Acquired Heart Disease  
- Myocarditis  
- Acute Rheumatic Fever  
- Bacterial Endocarditis  
- Kawasaki Disease  
- Rhythm Disturbances  
- Shock  
- Hypovolemic Shock  
- Cardiogenic Shock  
- Distributive Shock  
- Chapter Review

### 5 Central Nervous System  
- Altered Level of Consciousness  
- Meningitis  
- Encephalitis  
- Headache  
- Weakness  
- Seizures  
- Febrile Seizures  
- Afebrile Seizures  
- Status Epilepticus  
- Chapter Review

### 6 Metabolic Disease  
- Introduction  
- Diabetic Ketoacidosis  
- Hypoglycemia in Diabetic Children  
- Hypoglycemia in Nondiabetic Children

Cystic Fibrosis  
Pneumonia  
Respiratory Failure  
Chapter Review
Contents

12 Nontraumatic Orthopedic Emergencies . . . . . . . . . . 410
Developmental Dysplasia of the Hip 411
Rotational Deformities 416
Metatarsus Adductus 416
Internal Tibial Torsion 417
Excessive Femoral Anteversion 418
Angular Deformities 421
Blount Disease 421
Radial Head Subluxation 425
Legg-Calvé-Perthes Disease 427
Slipped Capital Femoral Epiphysis 429
Acute Septic Arthritis 432
Osgood-Schlatter Disease 436
Summary 437
Chapter Review 438

15 Procedural Sedation and Analgesia . . . . . . . . . . 498
Introduction 499
Pain Assessment 503
Medications Used in Analgesia and Sedation 506
Medication Selections 514
Summary 518
Chapter Review 520

13 Medical Emergencies . . . 446
Introduction 447
Sepsis 447
Fever in Children at Risk for Sepsis 451
Sickle Cell Disease 455
Dermatologic Emergencies 458
Epididymitis 462
Balanitis/Balanoposthitis 463
Urinary Tract Infections—Cystitis and Pyelonephritis 464
Hypertension 466
Acute Glomerulonephritis 468
Nephrotic Syndrome 469
Syncope 470
Chapter Review 473

14 Neonatal Emergencies . . 476
Introduction 477
Resuscitation of the Newly Born 477
Fever 481
Bacterial Sepsis 482
Lethargy 484
Irritability 485
Apnea 486
Cyanosis 486
Congenital Heart Disease 487
Grunting 487
Vomiting 487
Constipation 489
Diarrhea 490
Seizures 490
Withdrawal 491
Gastrointestinal Bleeding 491
Umbilical Problems 492
Hyperbilirubinemia 492
Chapter Review 494

16 Interface With EMS . . . . 524
Introduction 525
Origin of EMS Systems 526
Federal EMSC Program 527
EMSC Landmarks 533
Physician’s Role in EMSC 536
Future of EMSC 537
Chapter Review 538

17 Disaster Management . . 542
Introduction 543
Emergency Management Process 544
Children and Disaster Planning 545
Planning by Community Medical Practitioners 549
Planning by EMS Agencies 550
Planning by Hospitals 552
Planning by Community Agencies 554
Planning by Community Emergency Management 555
Response and Recovery Phases 556
Mitigation Phase 559
5.5 Ring Removal 665
5.6 Contact Lens Removal 666
5.7 Eye Patching 666
5.8 Tooth Reimplantation and Stabilization 667
5.9 Management of Penile Zipper Injury 668
5.10 Reduction of Inguinal Hernia 668
5.11 Reduction of Paraphimosis 668
5.12 Reduction of Rectal Prolapse 669

Chapter Review 671

Critical Procedures 671

Introduction 676
Section 1: Pediatric Length-Based Resuscitation Tape 676
Section 2: Cervical Spine Immobilization 677
Section 3: Monitoring 681
3.1 ECG Monitoring 681
3.2 Impedance Pneumography 683
3.3 Blood Pressure Monitors 683
3.4 Pulse Oximetry 683
3.5 Exhaled CO2 Monitors 685
Section 4: Oxygen Administration 686
4.1 Nasal Cannula 686
4.2 Oxygen Mask 687
4.3 Nonrebreathing Masks 687
4.4 Oxygen Hoods 688
Section 5: Suction 688
Section 6: Opening the Airway 691
6.1 Chin-Lift Maneuver 691
6.2 Jaw-Thrust Maneuver 692
Section 7: Airway Adjuncts 692
7.1 Oropharyngeal Airways 692
7.2 Nasopharyngeal Airways 693
Section 8: Bag-Mask Ventilation 695
Section 9: Management of Upper Airway Foreign Bodies With Magill Forceps 699
Section 10: Emergent Intubation 700
10.1 Endotracheal Intubation 700
10.2 Rapid Sequence Intubation 702
Section 11: Rescue Airway Techniques 710
11.1 Supraglottic Devices 710
11.1A Laryngeal Mask Airway 711
11.1B Combitube 713
11.2 Specialized Laryngoscopes 714
11.2A Fiberoptic Scopes 714
11.3 Laryngoscopes With Special Blades 714
11.3A Lighted Stylet 714
11.4 Tracheal Guides 715

Section 12: Surgical Airway Techniques 716
12.1 Needle Cricothyotomy 716
12.2 Retrograde Intubation 718
12.3 Wire-Guided Cricothyotomy 720
12.4 Surgical Cricothyotomy 720
12.5 Tracheostomy Management 721
Section 13: Cardioversion and Defibrillation 723
13.1 Cardioversion and Defibrillation 723
13.2 Automated External Defibrillator 725
Section 14: Vascular Access 727
14.1 Peripheral Venous Catheter Placement 727
14.2 External Jugular Vein Cannulation 729
14.3 Central Venous Catheter Placement 730
14.4 Umbilical Vein Catheterization 734
14.5 Intravenous Needle Placement 736
14.6 Venous Cutdown 738
Section 15: Thoracic Procedures 741
15.1 Needle Thoracostomy (Thoracentesis) 741
15.2 Tube Thoracostomy 742
15.3 Emergency Thoracotomy 744
15.4 Percutaneous Thoracentesis 745
Section 16: Miscellaneous Procedures 747
16.1 Nasogastric/Orogastric Intubation 747
16.2 Catheterization of the Bladder 749
Section 17: Orthopedic Procedures 752
17.1 Compartment Syndrome 752
17.2 Dislocations 756
17.3 Shoulder Dislocation 756
17.4 Elbow Dislocation 757
17.5 Knee Dislocation 758
17.6 Hip Dislocation 759
17.7 Splinting 759
17.7A Volar Arm Splint 760
17.7B Sugar-Tong Splint (Forearm) 760
17.7C Ulnar Gutter Splint 761
17.7D Thumb Spica Splint (Upper Extremity) 761
17.7E Sugar-Tong Splint (Lower Extremity) 763
17.7F Finger Splints 763
17.7G Posterior Splint (Lower Extremity) 763
17.7H Sugar-Tong Splint (Lower Extremity) 763
17.8 Crutch Walking 764
Chapter Review 765
